

LINDELWE MYEZA

Full Stack Software Engineer

lindelwenmyeza@icloud.com | +27 79 729 0693 | Cape Town, South Africa | [linkedin.com/in/lindelwe-myeza](https://www.linkedin.com/in/lindelwe-myeza)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 6+ years of experience building scalable, cloud-native applications in the banking and fintech domain. Proficient in .NET C#, Java, AWS, Azure, and modern frontend frameworks with a track record of delivering micro-services based solutions in regulated, agile environments. Skilled in DevOps practices, infrastructure-as-code, and mentoring junior developers. Passionate about clean architecture, continuous improvement, and shipping reliable software.

TECHNICAL SKILLS

Languages: C#, Java, Python, TypeScript, JavaScript, C++

Frameworks: .NET (MVC / Core), Vue.js, React, Node.js, WPF / XAML

Cloud & Infrastructure: AWS (Lambda, Aurora RDS, S3), Azure, Kubernetes, Terraform, Docker

Data & Messaging: SQL Server, NoSQL, Kafka, OpenSearch

DevOps & Tools: GitHub Actions, Instana, Unleash, GitHub Copilot, Claude, Bitbucket, Maven

Architecture: Microservices, Event-Driven Architecture, REST APIs, MERN Stack

PROFESSIONAL EXPERIENCE

Software Engineer: Full Stack – Capitec Bank Limited *September 2023 – Present*

- Design, develop and maintain full stack banking applications using .NET, Vue.js, and TypeScript, serving millions of customers through microservices and event-driven architectures deployed on Kubernetes.
- Built a task allocation service leveraging Terraform for infrastructure-as-code, Kafka for real-time message streaming, and Unleash for feature toggling, improving team workflow efficiency.
- Engineered serverless data processing pipelines using AWS Lambda (Python), Aurora RDS, and S3 buckets, reducing manual data handling and improving processing reliability.
- Managed an in-house platform for scaffolding repositories and generating deployment YAML files across multiple environments on GitHub, accelerating onboarding for new projects.
- Implemented observability and log tracing with Instana and OpenSearch, enabling faster incident diagnosis and reducing mean time to resolution.
- Mentored junior developers through code reviews and pull request guidance, and by clarifying requirements and providing technical direction on their day-to-day work.
- Collaborate using pair programming practices with Claude to improve code quality and development velocity.

Software Engineering Instructor (Part-Time) – TripleTen *October 2025 – May 2026*

- Tutored and mentored students across a 6 months bootcamp program called: Software Development.
- Provided code reviews, graded assignments, and delivered supplemental instruction, strengthening communication and technical leadership skills.

Learning Specialist (Part-Time) – 2U *June 2023 – June 2025*

- Tutored and mentored students across three bootcamp programs: Software Development, Artificial Intelligence, and Data Visualization, supporting over 50 students through a 24-week curriculum.
- Provided code reviews, graded assignments, and delivered supplemental instruction, strengthening communication and technical leadership skills.

Software Developer – Contour Technology *October 2022 – August 2023*

- Contributed across the full software development lifecycle—from requirements gathering and architecture design through to deployment—for enterprise backend services built in .NET C#.
- Developed desktop applications using Windows Presentation Foundation (WPF) and XAML, delivering robust and user-friendly interfaces for internal business tools.

Junior Software Developer – Astel Systems *August 2020 – September 2022*

- Integrated the Azure Cloud Portal with an IoT application built on .NET Core 6.0, successfully taking the solution from development through to production—a significant achievement as a junior developer.

- Gained hands-on experience across the full SDLC, including CI/CD pipelines, cloud resource provisioning, and production monitoring for cloud-based IoT services.

Trainee Developer – Wilson Bayly Holmes (WBHO) *February 2020 – July 2020*

- Supported system modernisation by contributing to migrations from RPG to Java, using Maven, Bitbucket, MySQL, HTML, and CSS.
- Focused on system enhancements and reporting functionalities, gaining foundational experience in enterprise software development.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- AWS Certified Cloud Practitioner
- AWS Developer Associate

EDUCATION

Bachelor of Science in Computer Science & Information Technology*December 2019*

University of KwaZulu-Natal, Westville

- Volunteered as an academic tutor in 3rd year, helping 1st-year students with practical programming exercises.
